Subject: Basic Assessment Update for the Proposed development of Bhangazi Cultural Tourism Lodge within the iSimangaliso Wetland Park, KwaZulu-Natal
Attachments: Responses and Comments Sheet_Final for PPP_August 2020.pdf; Bhangazi Lodge - Executive Summary_Final for PPP_25 August 2020.pdf; Bhangazi Lodge - IAP Notification Letter.pdf

Dear Interested and Affected Party,

The Bhangazi Community Trust was granted permission by the iSimangaliso Wetland Park Authority, to develop a tourism facility within the iSimangaliso Wetland Park, in KwaZulu-Natal. In an effort to exercise this right, the Bhangazi Trust proposes to develop a Cultural Heritage Lodge on a portion of the 9.94 ha piece of land allocated, which will consist of a 60-bed accommodation facility (including staffing quarters). The site is located along the Main Road to Cape Vidal in the Mtubatuba Local Municipality within the uMkhanyakude District Municipality. It lies along the fringe of a small south-eastern extension of Lake Bhangazi, just west of the St Lucia road before it crosses the coastal dune belt to Cape Vidal.

An application for Environmental Authorisation (EA) was submitted to the National Department of Environment, Forestry and Fisheries (DEFF) (formerly the Department of Environmental Affairs (DEA)) in accordance with the National Environmental Management Act, 1998 (Act No. 107 of 1998), as amended, and the Environmental Impact Assessment (EIA) Regulations (Government Notice R. 326), as amended in 2017. Furthermore, a Basic Assessment Report (BAR) was submitted to the DEFF for adjudication purposes on 16 July 2019.

A decision on the application was subsequently delivered by DEFF on 30 October 2019, where the EA was refused. The key reasons listed for the refusal of EA centred around the contention that the EIA process was not compliant with Regulation 44(1) of the 2014 EIA Regulations (which speaks to the recording of comments of Interested and Affected Parties (I&APs) in the project reports to be submitted for evaluation by the competent authority), as well as certain concerns about the proposed layout of facilities with respect to the potential sensitivities of the site.

The applicant decided to exercise their right to appeal the DEFF's decision, where an appeal was submitted following site visits with the authorities as well as updates to the site layout in order to address the concerns raised by the I&APs. In the DEFF's decision on the appeal, two of the reasons cited for refusal of the EA were dismissed and one was upheld. The ground that was upheld called for the updating of the BAR to account for the changes to the site layout. The DEFF also ruled that a new Public Participation Process (PPP) would need to be initiated to afford the public an opportunity to comment on the revised BAR.

In this regard, ERM has revised the BAR based on the new layout and has initiated a new PPP. In compliance with the Disaster Management Act (57/2002): Directions Regarding Measures to Address, Prevent and Combat the Spread of COVID-19 Relating to National Environmental Management Permits and Licences (05 June 2020), a Public Participation Process Plan has been developed to detail how the new PPP will be undertaken. This Plan was approved by DEFF on 13 August 2020.

The updated BAR is accompanied by the updated Comments and Response Report (CRR) from the previous consultation process, including responses received from I&APs regarding the DEFF's decisions and outcomes of the BAR adjudication and appeal process.

The Updated BAR together with the updated CRR are available for review and comment from **27 August 2020 to 19 October 2020 (with 19 October being the last day for submitting comments)**. The report can be accessed from the Project Website: <https://www.erm.com/bhangazi-lodge-ba/>

All comments, issues and responses are to be communicated with:

Stephanie Gopaul

Tel: 031 265 0033

Email: commentsandresponses@erm.com

For your convenience, we have attached an Executive Summary of the BAR update and new PPP, as well as a Responses and Comments sheet for you to register as an IAP and submit comments to ERM.

Thank you for your participation during this process and we look forward to receiving your feedback.

Kind Regards,

ERM

Kamo Mokhine

Subject: Bhangazi Community Trust Basic Assessment Report (BAR)

Dear Stakeholders

I hope you are well.

Just a final reminder that the commenting period on Bhangazi Community Trust Basic Assessment Report (BAR) is ending on Monday 19 October 2020. We request that if you have comments, please send them through before the end 19 October 2020.

The updated BAR is available for review and comment until **19 October 2020 (with 19 October being the last day for submitting comments)**. The report can be accessed from the Project Website: <https://www.erm.com/bhangazi-lodge-ba/>.

All comments, issues and responses are to be communicated with:

Stephanie Gopaul

Tel: 031 265 0033

Email: commentsandresponses@erm.com

Thank you for your participation during this process and we look forward to receiving your feedback.

Kind Regards,
ERM

Dear Mrs Goupal

COMMENTS ON THE AMENDED DRAFT BASIC ASSESSMENT REPORT FOR THE PROPOSED BHANGAZI CULTURAL HERITAGE LODGE, ISIMANGALISO WETLAND PARK, KWAZULU NATAL PROVINCE

The amended Basic Assessment Report (BAR) dated August 2020 and received by this Department on 28 August 2020, refer.

This letter serves to inform you that the following information must be included to the final BAR:

(a) Listed Activities

- It is noted no amended application has been submitted. Please ensure that all relevant listed activities in the BAR are the same as listed activities applied for on the initial application form received by the Department.
- If the activities applied for in the application form differ from those mentioned in the final BAR, an amended application form must be submitted. Please note that the Department's application form template has been amended and can be downloaded from the following link:
<https://www.environment.gov.za/documents/forms>.
- It is imperative that the relevant authorities are continuously involved throughout the basic assessment process as the development property possibly falls within geographically designated areas in terms of numerous GN R. 985 Activities.

(b) Public Participation Process

- (i) The following information must be submitted with the final BAR:
 - a) Copies of all comments received during the initial BAR as well as **AMENDED DRAFT BAR** comment period; and
 - b) A comment and response report which contains all comments received and responses provided to all comments and issues raised during the public participation process for the initial BAR as well as **AMENDED DRAFT BAR**. Please note that comments received from this Department must also form part of the comment and response report.
- (ii) Please ensure that all issues raised and comments received during the circulation of the amended draft BAR from registered I&APs and organs of state which have jurisdiction (including this Department's

Biodiversity Section and DEFF: Forestry) in respect of the proposed activity are adequately addressed in the final BAR.

- (iii) Proof of correspondence with the various stakeholders must be included in the final BAR. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments.

(c) Environmental Management Programme (EMPr)

Kindly ensure that the EMPr in the final BAR includes the following:

- a) Curriculum vitae of the EAP;
- b) A map at an appropriate scale which superimposes the proposed activity, its associated structures, and infrastructure on the environmental sensitivities of the preferred site, indicating any areas that should be avoided, including buffers;
- c) A description of the impact management outcomes, including management statements, identifying the impacts and risks that need to be avoided, managed and mitigated as identified through the environmental impact assessment process for all phases of the development including—
 - (i) Planning and design;
 - (ii) Pre-construction activities;
 - (iii) Construction activities;
 - (iv) Rehabilitation of the environment after construction and where applicable post closure; and
 - (v) Where relevant, operation activities;
- d) The method of monitoring the implementation of the impact management actions contemplated in paragraph (f) of Appendix 4 of the EIA Regulations 2014, as amended;
- e) The time periods within which the impact management actions contemplated in paragraph (f) of Appendix 4 of the EIA Regulations 2014, as amended, must be implemented;
- f) The mechanism for monitoring compliance with the impact management actions contemplated in paragraph (f) of Appendix 4 of the EIA Regulations 2014, as amended; and
- g) an environmental awareness plan describing the manner in which risks must be dealt with in order to avoid pollution or the degradation of the environment.

(d) Layout Map

The final BAR must include a map at an appropriate scale which superimposes the proposed activity and its associated structures and infrastructure on the environmental sensitivities of the preferred site indicating any areas that should be avoided, including buffers.

(e) Undertaking of an Oath

- i. Please note that the final BAR must also have an undertaking under oath/ affirmation by the EAP.
- ii. An undertaking under oath or affirmation by the EAP (administered by a Commissioner of Oaths) as per Appendix 1(3)(r) of the NEMA EIA Regulations, 2014, as amended, which states that the BAR must include: *“an undertaking under oath or affirmation by the EAP in relation to:*
 - a) the correctness of the information provided in the reports;*
 - b) the inclusion of comments and inputs from stakeholders and I&APs;*
 - c) the inclusion of inputs and recommendations from the specialist reports where relevant; and*
 - d) any information provided by the EAP to interested and affected parties and any responses by the EAP to comments or inputs made by interested and affected parties”.*

General

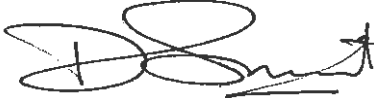

When submitting a final BAR online, you are requested to separate the main report and appendices. Appendices must be attached in the format as indicated on Page VII of the BAR. Please refrain from submitting the BAR as well as appendices as one big file.

Please also ensure that the final BAR includes the period for which the Environmental Authorisation is required and the date on which the activity will be concluded as per Appendix 1(3)(1)(q) of the NEMA EIA Regulations, 2014, as amended.

Should you fail to meet any of the timeframes stipulated in Regulation 19 of the NEMA EIA Regulations, 2014, as amended, your application will lapse.

You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.

Yours sincerely

Mr Sabelo Malaza

Dear Ms Gopaul

BASIC ASSESSMENT UPDATE AND PUBLIC PARTICIPATION PROCESS FOR THE BHANGAZI CULTURAL HERITAGE TOURISM LODGE WITHIN THE ISIMANGALISO WETLAND PARK, KWAZULU NATAL (REFERENCE 14/12/16/3/3/1/2015)

Your invitation for comment on the above, dated 27 August 2020, has reference. Please find herewith the comment of the Directorate Forestry Regulation and Oversight Department of Environment, Forestry and Fisheries (DEFF).

1. The changes made as agreed will lead to a great reduction in the footprints. Not all the services options were discussed in sufficient detail during the meeting and site visit I attended this year, but it was agreed that a forest specialist assist with the final design aspects and siting of units and the facilities such as boardwalk and viewing platform.
2. The Isimangaliso motivation of exceptional circumstances is given in point 2.3.3 of the BAR, but the response of DAFF which placed it in proper legal context is not provided. That context should be given, because this is a very important principle which underpins much of the comments of the Forestry Branch of DEFF (formerly with DAFF).
3. Table 2-1 of the executive report indicates that the chalets would not necessarily lead to clearance of canopy. Yet it was agreed that all units have to fit in under the canopy, and that is also partly the reason why the maximum diameter of trees that may be removed were limited, and why the forest specialist has to participate in the final layout to find suitable sites where units fit either under the canopy, or in existing forest gaps. The

layout plan of February 2020 thus does not show the final location of tented platforms and chalets and that should be stated in text referring to that plan. The discussion on the DEFF guideline document under 4.2.8 of the BAR states specifically: "Small pockets of open land in the forest have been identified to develop accommodation units, under the canopy, nestled within existing trees". This statement thus more accurately reflects what was agreed upon, except that it cannot be stated that these sites have all already been identified, the forest specialist will still assist with refinement of site selection and the Scope of Work in Table 6-2 and points made under point 8.2.4 later in the report appears to confirm that work on this is still required, and that site selection and design adaptations will be a constant process. The document needs to be consistent throughout.

4. Other design aspects discussed under 2.7 of the BAR which the forest ecologist needs to assist with is the water, sewerage and energy supply. These may have some impacts or footprints that are not discussed in detail, and may need to be mitigated, apart from the technology also discussed in 3.3. Services like power cables and water supply should be brought in under the boardwalk, or fixed to the boardwalk access paths. Point 3.3 of the BAR describes the sewage treatment as being accommodated on site. It is not clear if this is one treatment facility servicing all units. If so, will it be placed outside the natural forest, and would it then be possible for the pipes leading to the sewage treatment facility to also be accommodated in the boardwalk footprint as far as possible? These are aspects the appointed forest specialist must also look at. These comments also relate to the table 6-1 describing the scope of work.
5. The final layout map of figure 3-2 includes an elevated viewing platform and describes it as placed in a cleared area. It is assumed this is an existing cleared area, and not an area to be cleared (even if placed in natural forest, minimal clearing or pruning would be required if the location is carefully chosen for the corner anchor stollations, which are actually the only points of impact for a raised deck platform, and steps going up can start at the base of one or more anchor stollations). Under the platform the canopy can remain intact. Globally there are examples how this can be done, and can be found on the internet through the google application.
6. Under the National Forests Act of 1998 described in 4.1.3 of the BAR the Box describing the applicability of the Act to the project mentions that the licensing process is handled separately from the EA. Prior to the meeting in March 2020 I was informed that the State forest area encompassing the site was transferred to Isimangaliso, which would have meant transfer of National Forests Act powers as well (Sections 7, 15 and 23 which provides for licensing or pruning of tree cutting in natural forest, protected trees and activities on State forest land respectively).

My attention was recently drawn to the fact, however, that the Government Gazette Notice of 1 December 2006 which transferred management of that land from the then Department of Water Affairs and Forestry was not an assignment of State forest land (with which licensing powers are transferred), but that it was a "Release of State Forest Land Areas Not Required for Forestry Purposes for Allocation to the Department of Environmental Affairs and Tourism: Greater St Lucia Wetland Park". Please see the Government Gazette Notice attached. Release of State forest land means it is not State forest anymore and Section 23 does not apply anymore, whereas assignment retains the

State forest status with transfer of powers to the new management agent. Sections 7 and 15 then still apply but as far as I could determine in the limited time available the powers are held by the Directorate Woodlands and Indigenous Forests in the KZN regional office who has to issue the licence. This should not be problematic, and there should be no delay because the major concerns have been thrashed out.

7. I also attach exemptions published under the National Forests Act of 1998, which indicates that protected areas are exempt the requirement for licensing for handling protected trees, but not for natural forests. There are reasons for this which cannot be elaborated upon in this comment.
8. Point 8.2.4 relating to the forest canopy and flora, and the mitigation measures stated to minimize impact should also refer to avoidance or rescue of red data plants, the diameter limitation of trees that can be removed, and avoidance of canopy tree removal, placement in open areas etc. Trees for removal must be marked beforehand and be inspected by the forest specialist and relevant forest officers. Proper control of construction staff will be required to prevent illegal bark harvesting and snares.

For more information on the matter, kindly contact Ms Mulalo Sundani at Mulalosu@daff.gov.za: 012 309 5865 or myself at izakvdm@daff.gov.za.

Best Regards

.....

PROPOSED BHANGAZI CULTURAL HERITAGE LODGE: REVISED DRAFT BASIC ASSESSMENT REPORT, 2020

Dear Ms Gopaul

Herewith comment on ERM's Draft Basic Assessment Report (DBAR) of reference 0282731 and dated August 2020.

1. PSAM's comment of June 2019 on the previous DBAR centered on natural forest impacts, and as such our input included various references to the National Forests Act, 1998 (NFA).
2. In turn, ERM's responses to our comment contained multiple indications (see updated Comments and Responses Report included with the 2020 DBAR as Annexure D) that any licencing to be undertaken in terms of the NFA *will be done as a separate process*, as well as the statement that licencing *does not fall under the current Basic Assessment process being discussed*.
3. The separation between NEMA and NFA application processes in their own rights is a given.
4. However, since one of the activities for which NEMA authorisation is being sought at Bhangazi is *the clearance of an area of 300 square meters or more of indigenous vegetation* (in accordance with Activity 12 of Listing Notice 3, as detailed on p. 43 of the DBAR), and the vegetation involved is natural forest, any evaluation of detail pertaining to the project's impacts on natural forest clearly straddles both processes.
5. This is reinforced by Chapter 2 of the NFA containing sustainable forest management principles which, in terms of section 3 (1) (a) of the Act, must be considered and applied *in the exercise of any power or the performance of any duty in terms of any other legislation where the exercise of that power or the performance of that duty will impact on a natural forest*.
6. These principles must likewise be considered and applied *by any person required in terms of any legislation to carry out an environmental impact assessment in respect*

of any activity which will or may have an effect on natural forest, as pointed out in our comment on the previous DBAR.

7. Indeed, the DBAR reflects that ERM has engaged both the principles and the NFA administering authority, viz. the Forestry Branch of the national Department of Environment, Forestry and Fisheries (DEFF), in relation to natural forest impacts.
8. On the other hand, PSAM is not convinced that the DBAR deals with forest impacts in sufficient detail to enable authority decision-making in this regard, whether in terms of the NFA or NEMA.
9. This is starkly illustrated by the manner in which the DBAR deals with sewage treatment at the proposed lodge. At p. 40 it is indicated that an above ground treatment plant is the preferred system due to its anticipated *minimal impact*, but the implications of 1000 liter primary settling tanks being installed *at each room or unit* do not receive mention.
10. It is reasonable to presume that notwithstanding the reference to an above ground treatment system, within the context of the proposed lodge the presence of above ground primary settling tanks in conjunction with chalets would be undesirable, and that underground installation of these tanks would be preferable.
11. This would give rise to at least eighteen associated excavations, the individual and cumulative impacts of which would not be insignificant, given both the abundance and diversity of biological material, over and above extensive tree and plant root networks,¹ contained within the forest floor, and the importance of soil structure to the forest's integrity.
12. Regardless of whether they are located above or below ground, each settling tank would need to be connected to a main sewer line, and this would likely also entail at least eighteen excavations, on the presumption that the feeder lines would need to be entrenched.
13. This scenario presumes that the main sewer line could be located outside of the forest margin, but if or where it could not be, this too would obviously necessitate forest floor disturbance.
14. The DBAR is also silent in relation to the means by which water and electricity would be conveyed to the proposed chalets. Conceivably this could be achieved by way of infrastructure attached to the underside of the proposed boardwalk, and would not also require trenching activities, but the point is that a forest impact assessment needs to include coverage of matters such as these.
15. The report furthermore fails to indicate whether infrastructure would be required for the capture and directing of chalet storm water runoff, and to provide pertinent details regarding the same if it would be.

¹ As an aside, note that by virtue of section 2 (xxxvi) of the NFA the term "tree" includes *any root*, and hence the disturbance of tree roots is an activity which is subject to licensing under the Act.

16. Last but not least in so far as forest floor disturbances are concerned, while stilted chalets with boardwalk access are presented as environmentally “soft” options, impacts arising from the innumerable excavations required for the planting of pole supports should not be underestimated.
17. At the same time, it is noted that provision has been made for single access avenues from the main complex to where the boardwalk spans the two and four bed chalet clusters respectively; in this respect it is trusted that operational practicalities will not prompt a perceived need for additional access link routes, and hence further substrate intrusions.
18. In any event, the point here is that in order to form the kind of comprehensive, realistic picture which is a necessary prerequisite for informed decision-making, authorities need to be presented, *inter alia* in this case, with explicit information regarding all project elements, and their potential impacts on natural forest.
19. Proceeding in this vein, it could be argued that what the authorities are being asked to authorize at this stage is more akin to a concept than a project.
20. This is because as with the absence of infrastructure detail and its linkage to locality-specific forest elements, the preferred layout plan in Figure 3-2 of the DBAR does not denote chalets in locations where they will necessarily occur, and accordingly, precise indications of their impacts are not, and cannot be, provided.
21. It is noted that forest impact mitigation and avoidance measures advocated at p. 98 the DBAR include *as far as possible, building flexible structure shapes to fit around larger trees, and placing of raised platforms and boardwalks in old camp sites, with open understory.*
22. It is further recommended that *a forest ecologist be present when the sites are surveyed and laid out,* while section 6.3.3 of the Environmental Management Programme (annexure B to the DBAR) includes various associated planning and design measures.
23. It is however contended that the pursuit of this approach subsequent to the granting of NEMA and/or NFA approval would amount to the cart having been placed before the horse.
24. The laying out of all the proposed chalets and their ancillary infrastructure should precede approval, with a consequent evaluation of the impacts which would accrue from project implementation in accordance with the layout being availed to the authorities for consideration.
25. This is regarded as a reasonable approach given that the proposed project would be located within an ecosystem which has been assigned endangered status, as alluded to in PSAM’s comment on the 2019 DBAR.
26. It is an approach which is not without precedent, in as much as the State has previously required it of proponents of forested property development projects.

27. The proposed approach moreover accords with a court-determined benchmark for structured assessment of the scale of natural forest impacts, as DEFF Forestry will be aware.
28. In fact, premised on the writer's observation that construction-related natural forest impacts consistently exceed those predicted at project inception stage,² it is submitted that it is the only methodology which enables proper appreciation of the nature and extent of probable impacts.
29. Separately, in its comment on the 2019 DBAR PSAM queried the report's *property description*, ERM's response to which was noted, but did not resolve the issue underpinning the query.
30. Regardless, subsequent investigation points to the fact that whereas the site of the proposed project would previously have fallen within either the Eastern Shores or Cape Vidal State forest, these State forests no longer exist, by virtue of their release³ under Notice 1187 of 2006 (copy included with this submission) *for allocation to the Department of Environmental Affairs and Tourism: Greater St Lucia Wetland Park*, on the basis that they were not required for forestry purposes.
31. This is pointed out for the record, since both the Comments and Response Report and the minutes of the site meeting of 12 March 2020 (see Annexure I) allude to DEFF not being the NFA licensing authority for Bhangazi due to the transfer of administering powers under the NFA along with the allocation of the State forests from the (then) Department of Water Affairs and Forestry to the Department of Environmental Affairs and Tourism.
32. It is emphasized, in accordance with para. 30 above, that the release of State forest land negates the possibility of a concomitant transfer of powers under the NFA to another organ of State, since the effect of the release is that the land ceases to constitute State forest.

Sincerely.

N G Scarr
PSAM Monitoring & Advocacy Programme

Date: 19 October 2020

² The observation stems from protracted interaction with forest-impacting activities in both government and non-government capacities.

³ As provided for in section 50 (3) of the NFA.

Hi Zama,

I hope you're doing well.

This email is to give you an update on the final Bhangazi BAR.

If you'll recall, we completed our PPP late last year (date of 30 days comment period) and we were meant to have submitted the final report before the Christmas shutdown. Unfortunately, there were some delays with some of our internal and external team members being affected by COVID-19.

We have since resumed the finalisation of the BAR and envisage that the final report will be submitted in the next few weeks.

Hoping you find this in order

Kind Regards
Kamogelo Mokhine

Attachments: Pre-Application Request for the Bhangazi Lodge Basic Assessment - (REF: 1412163312015)

Good day Zama,

Hope you're doing well.

This email is in connection with the request for pre-application that we submitted on Friday 18 June 2021 (please refer to the attached email).

We would like to make a special request to have representatives from the following units present at the meeting:

- Biodiversity, including Forestry (i.e. Mr Izak van de Merwe)
- World Heritage Section (Ms Willeen Olivier)
- Climate change unit
- Appeals (Ms Aruna Seepersadh)

This is to ensure that what we propose in the re-application is in line with the Department's requirements as a whole.

Trusting you find this in order

Kind Regards

Subject: RE: 14/12/16/3/3/1/2015 - Final Basic Assessment Report (Updated) for the Bhangazi Cultural and Heritage Lodge

Dear Kamo

Please consider the email received from EIA application as an official email that lapsed and closed your applications. Should you wish to resubmit the new application, you can use the lapsing email you received from EIA application.

The email response that I have provided, was based on the follow-up email you sent regarding the lapsing email you received from the EIA application. The purpose of the response was to outline the process to be followed should you wish to restart the EIA process and avoid further delays on the project. As I have indicated in the previous email, we are available to have a pre-application meeting with you to outline the process to be followed before resubmitting the new application.

Should you require a lapsing letter on the Department's letterhead, you must send an official request to EIA applications. Once received, the Department will respond to your request within the period of 30 days.

Regards

Subject: RE: 14/12/16/3/3/1/2015 - Final Basic Assessment Report (Updated) for the Bhangazi Cultural and Heritage Lodge

Good day Nyiko,

Hope you're doing well.

Thank you for the clarity on the Department's response on the application lapse.

Can we kindly get the contents of the response in an official DFFE letter? This is for record keeping purposes and to avoid any misinformation going forward.

Thank you so much

Kind Regards

Kamogelo Mokhine

Subject: RE: 14/12/16/3/3/1/2015 - Final Basic Assessment Report (Updated) for the Bhangazi Cultural and Heritage Lodge

Dear Kamo

Below email refers

Please note that the Appeal decision instructed the Applicant to restart the EIA process whereby the draft BAR was to be amended to reflect the changes to layout map and also to address comment from Stakeholders which were not addressed on the final BAR. The amended draft BAR was to be subjected to 30 days comments period.

This Department received an amended draft BAR on 28 August 2020 and comments were provided on 25 September 2020. The 90 days timeframe commenced on the date of receipt of the amended draft BAR, which was 28 August 2020. From the Department's comments dated 25 September 2020, we indicated that "Should you fail to meet any of the timeframes stipulated in Regulation 19 of the NEMA EIA Regulations, 2014, as amended, your application will lapse".

Regulation 19(1)(a) of the NEMA EIA Regulations, 2014, as amended, states that: "Where basic assessment must be applied to an application, the Applicant must, within 90 days of receipt of the application by the competent authority, submit to the competent authority -

(a) a basic assessment report, inclusive of specialist reports, an EMP, and where applicable a closure plan, which have been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority."

Should there be significant changes or new information that has been added to the BAR or EMP which changes or information was not contained in the reports or plans consulted on during the initial public participation process, you are required to comply with Regulation 19(b) of the NEMA EIA Regulations, 2014, as amended, which states: "the applicant must, within 90 days of receipt of the application by the competent authority, submit to the competent authority – (b) a notification in writing that the basic assessment report, inclusive of specialist reports an EMP, and where applicable, a closure plan, will be submitted within 140 days of receipt of the application by the competent authority, as significant changes have been made or significant new information has been added to the basic assessment report or EMP or, where applicable, a closure plan, which changes or information was not contained in

the reports or plans consulted on during the initial public participation process contemplated in subregulation (1)(a) and that the revised reports or, EMPr or, where applicable, a closure plan will be subjected to another public participation process of at least 30 days”.

Since we did not receive the notification as per Regulation 19(b) or request of extension in terms of Regulations 3(7), your application has lapsed, the 90 days timeframe to submit final BAR was November 2020.

Please note that it is your duty as an EAP to manage the application you have submitted to the Department to ensure that you meet timeframes as stipulated in the EIA Regulations.

As a way forward on the matter, the following need to be done:

- A new application will have to be lodged with the Department; however prior to lodging the application form, you need to submit a PPP Plan for approval to the Department. The PPP Plan must be submitted together with a request for pre-app to EIA applications. The request will then be allocated to Ms Langa.
- The EIA Regulations requires that when you lodged an application form, within 90 days of receipt of application, you must submit a report that is subjected to 30 days PPP process.
- We take note that you have already done two round of PPP in the project, but it is a requirement that you do another round of 30 days commenting period after you have lodged a new application. When distributing the draft BAR for comments to I&APs you have to inform them that the previous application lapsed and the EIA Regulation requires you to do another round of PPP for new application and there are no major changes in the BAR. All previous PPP Process information must be included in the BAR to be submitted. You do not have to redo the newspaper advert and onsite notices; previous information can be used. The new information that we will need to see in the FBAR, is the new notification of the availability of the new draft BAR that you will be submitting to the Department to Interested and affected parties
- Since you have the BAR ready which was submitted to the Department, you need to use the same report to distribute to I&APs for 30 days comments. You will then receive new reference number once we receive the new application. You are advised to lodge a new application together with the draft BAR, you will then receive an acknowledgement of receipt with a new reference number and within 30 days we will provide you with comments on the BAR.

Please note that, it is not a must to have another pre-application on the application if you do not require it, you just have to indicate on the pre-app request that the pre-app is not necessary. The PPP plan to be submitted must reflect all the PPP process done on the application and highlight the new PPP process for the new application.

If you do not understand the content of this email which outline the process, feel free to contact us for a quick meeting, and we will be able to advise you further.

Regards
Nyiko Nkosi

Subject: RE: 14/12/16/3/3/1/2015 - Final Basic Assessment Report (Updated) for the Bhangazi Cultural and Heritage Lodge
Importance: High

Good day Zama,

This email is in connection with the response from the Department regarding the lapse of the Bhangazi Lodge EA application, and to seek clarity on the 90-day time frame for this project.

As you are aware, this is an unprecedented case and there has been quite a bit of back and forth since the EIA was initiated. With that said, given that the reference number was obtained a while back, we would like clarity on how exactly the 90 days was calculated. Other than the PPP itself, there was no clear instruction on the timeframes of delivering on the BAR following the appeal decision. Notwithstanding this, we did not receive any communication from the Department notifying us of the application lapse and the closure of the case file, which is the standard procedure. If you'll recall, I sent a progress email earlier this year (see attached), however we did not receive a response. Surely we should have been notified then of the lapse in the application?

Given that there has already been two rounds of PPP on the project, would it be possible to use the information gathered from those processes (as contained in the Final BAR), and submit a new application to get a new reference? This would be a cost and time-effective alternative to restarting the application process from scratch given that no new information is going out to the public, and we do not anticipate any new comments on the proposed development.

Can you please advise?

Kind Regards

Kamogelo Mokhine

Dear Kamo.

Please note that according to our records, the application is lapsed. Please note that we cannot consider your Final BAR as you submitted the draft BAR for comments in August 2020. Furthermore, it has been more than 90 days from resubmitting the draft BAR for comment and the receipt of the Final BAR for decision making, as the appeal decision instructed you to go back into the EIA Process. If you wish to continue with the proposed development, a new application for EA must be lodged to this Department, in accordance with its current rules and requirements.

The files have been removed from the system.

If you have any queries, please contact Ms Langa and/or Ms Nkosi who are copied in this email. Please do not copy this mailbox in your correspondences.

Dear Kamo

The Public Participation Process (PPP) Plan for the abovementioned project dated July 2021 and received on 09 July 2021 refer.

The Department has evaluated the Public Participation Plan which is submitted as per Minister Directive dated 05 June 2020 in response to Covid-19 pandemic and hereby approves the plan for the abovementioned project.

You may proceed with the public participation process in accordance with the tasks contemplated in the PPP plan. Should you wish to deviate from the submitted PPP Plan, the amended PPP Plan must be submitted to the Department for approval prior commencement.

Please ensure that the PPP plan forms part of the report that will be submitted to the department. Kindly ensure that all I&APs are consulted as per requirement of EIA Regulations 2014 as amended.

You are hereby reminded of Section 24F of the National Environmental Management Act 1998 (Act No. 107 of 1998), as amended, that no activity may commence prior to an Environmental Authorization being granted by the Department.

ERM Reference Number: 0282731

BASIC ASSESSMENT FOR THE PROPOSED DEVELOPMENT OF BHANGAZI CULTURAL TOURISM LODGE WITHIN THE ISIMANGALISO WETLAND PARK, KWAZULU-NATAL
DFFE REF: 2021-06-0024

RELEASE OF THE DRAFT BASIC ASSESSMENT REPORT FOR PUBLIC COMMENT

Bhangazi Community Trust was granted permission, by the iSimangaliso Wetland Park Authority, to develop a tourism facility within iSimangaliso Wetland Park (which is a World Heritage Site). In an effort to exercise this right, the Bhangazi Trust proposes to develop a Cultural Heritage Lodge on the 9.94 ha piece of land allocated, which will consist of 68 sleeping units including staffing quarters. The site is located along the Main Road to Cape Vidal in the Mtubatuba Local Municipality within the uMkhanyakude District Municipality. It lies along the fringe of a small south-eastern extension of Lake Bhangazi, just west of the St Lucia road before it crosses the coastal dune belt to Cape Vidal.

Notice is hereby given that the Bhangazi Community Trust is running an Environmental Authorisation process, under the jurisdiction of the National Department of Environment, Forestry and Fisheries (DFFE) in accordance with the National Environmental Management Act, 1998 (No. 107 of 1998), as amended, and the Environmental Impact Assessment (EIA) Regulations (Government Notice R. 326). The Project will require Environmental Authorisation through a Basic Assessment (BA) in terms of NEMA as the following activities are triggered:

	Project Activities
GN R 324	Activity 4, 6, 12, 14
GN R 327	Activity 12, 30

Environmental Resources Management (ERM) has been appointed as the independent Environmental Assessment Practitioner (EAP) office to undertake the Basic Assessment and associated Public Participation Processes in light of the triggered activities.

The Basic Assessment Report is available for comment from **23 July 2021 to 23 August 2021** (i.e. a 30 day comment period) and can be accessed electronically from the project website using the following link: <https://www.erm.com/en/public-information-sites/basic-assessment-for-the-proposed-cultural-tourism-lodge-development-at-lake-bhangazi> or requested from ERM (for email transmission).

Stakeholders are invited to register as Interested and Affected Parties (I&APs) and to participate in the Basic Assessment process by identifying issues of concern and providing suggestions to enhance benefits of the project. Registered I&APs will be kept informed throughout the process. To register as an I&AP, submit comments, and to obtain more information, please contact ERM at the details below.

Le ndawo iku-Main Road oya e-Cape Vidal kuMasipala Wasekhaya eMtubatuba kuMasipala Wesifunda uMkhanyakude. Ingasemngceleni weselulo esiseningizimu esempumalanga yeDamu iBhangazi, entshonolanga nje yomgwaqo i-St Lucia ngaphambi kokuthi unqamule ibhande elisentabeni engasogwini oya e-Cape Vidal.

Lapha kunikezwa isaziso sokuthi i-Bhangazi Community Trust izohambisa isicelo soKugunyazwa Kwezemvelo kuMnyango Wezemvelo Kazwelonke ngokuhambisana noMthetho Wokuphatwa Kwezemvelo Kazwelonke, 1998 (Nombolo 107 ka-1998), njengoba uchitshiyelwe, kanye neZimiso Zomthetho Zokuhlola Umthelela Emvelweni (Isaziso Sikahulumeni R.326). Iphrojekthi izodinga Ukugunyazwa Kwezemvelo ngokusebenzisa Ukuhlolwa Okuyisisekelo ngokoMthetho Wokuphatwa Kwezemvelo Kazwelonke (NEMA) njengoba imisebenzi elandelayo iqaliswe:

	Imisebenzi yePhrojekthi
GN R 324	Imisebenzi 4, 6, 12, 14
GN R 327	Umsebenzi 12, 30

I-Environmental Resources Management (ERM) iqokwe njengehlovisi elizimele leSisebenzi Sokuhlola Ezemvelo (EAP) ukuthi lenze Ukuhlolwa Okuyisisekelo kanye neZinhlelo Zokuhlalanyela Komphakathi ezihambisana nakho maqondana nemisebenzi eqaliswe.

Umbiko Wokuhlola Okuyisisekelo uyatholakala ukuze kuphawulwe kusukela ngomhla ka-23 July 2020 ukuya kumhla ka 23 August 2020 (okungukuthi yisikhathi sokuphawula esiyizinsuku ezingama-31) futhi unqamulakala ngokwe-elektroniki kuwebhusayithi yephrojekthi ekuxhunyweni okulandelayo: <https://www.erm.com/en/public-information-sites/basic-assessment-for-the-proposed-cultural-tourism-lodge-development-at-lake-bhangazi> noma icelwe e-ERM (ukwenzelwa ukudluliswa nge-imeyili).

Ababambiqhaza bayaminywa ukuthi babhalise njengeBantu Abanentshisekelo Nabathintekayo (ama-I&AP) nokuthi bahlanganyele ohlelweni Lokuhlolwa Okuyisisekelo ngokukhomba izinto ezikhathazayo nokunikeza iziphakamiso zokwenza ngcono izinzuzo zephrojekthi. Ama-I&AP abhalisile azohlala aziswa ngesikhathi sohlelo lonke. Ukubhalisa njenge-I&AP, ukuletha imibono yokuphawula, nokuthola ulwazi oluthe xaxa, sicela uxhumane ne-ERM kule mininingwane engezansi.
