

ERM EVENTS

Making the case to attend ERM Global Remediation Management Roundtables

Corporate EHSS budgets are under constant scrutiny and, as remediation leaders of your business, the value and potential return on investment of attending external sessions must be readily apparent to justify spending your time attending these events.

With this understanding, we have developed this document to help frame the value of attending an ERM Global Remediation Management Roundtable for both yourself and/or internal approvals, if needed.

Key Benefits

For the past decade, ERM has brought together thought leaders in global remediation management to share ideas and address issues related to contaminated site management, hosting over 30 global remediation management roundtables throughout the US, Europe, and Latin America.

Managing a global remediation portfolio to achieve business results requires a sound strategy, consistent processes, up-to-date knowledge of regulations and trends, and the right tools. Feedback from previous attendees of these events have emphasized the following benefits from this event:

- **Gain exclusive peer-to-peer insights:** Hear directly from other industry remediation leaders as they present and share their experiences. Previous roundtable attendees include senior global remediation executives representing leading companies in aerospace, automotive, chemical, manufacturing, mining, oil and gas, pharmaceutical and power sectors.
- **Address your specific challenges:** Engage with your peers in a sales-pitch-free environment to discuss shared topics of interest as you play a direct role in shaping the agenda. The agenda for each roundtable is shaped by your and your peer's feedback to ensure discussions (guided by both ERM and industry speakers) are relevant to your specific interests and issues.
- **Benchmark your organization against other leading companies:** Survey results from attendees, as well as other global roundtable participants, are shared during the session, offering helpful insights and comparisons against peers.
- **Be prepared:** Hear from your peers and industry experts on what might be emerging to help frame future risk and uncertainties that may be relevant to your business - helping you and your organization stay ahead of the curve.

"My expectations of the roundtable were open dialogue and hearing different perspectives on common issues – both were achieved."

*Jack Spicuzza,
Director Remediation, Univar*

- **Maximize value and optimize business results:** Discuss the strategic objectives of portfolio management and how activities across the entire life cycle can help you develop the right conceptual model that drives successful remediation outcomes for your organization.
- **Explore the latest trends:** Learn more about the regulations and tools influencing the next generation of remediation management and best practices to address key challenges.

“My second [roundtable] and still impressed with these events...Networking outside my ‘vertical’ was very valuable.”

*Shari London,
Shell*

Sample Agenda

Agenda topics for each roundtable are shaped around the areas of greatest interest to you and your peers. The following agenda is an example for reference:

Day 1

12:00 - 13:00	Registration & Opening Lunch	<hr/> <p>“I liked the interactive discussions and the different perspectives offered by the variety of companies.”</p> <p><i>Greg Whetstone, Southern Company</i></p> <hr/>
13:00 - 14:00	Introductions & Overview of Pre-Meeting Survey Results	
14:00 - 14:45	Developing a Global Remediation Program – Challenges and Lessons Learned	
14:45 - 15:00	Break	
15:00 - 16:00	Getting the Most out of Your Consulting Value Chain through Risk Reviews and Management Systems
